

C. Dellacherie, S. Martínez and J. San Martín Description of the sub-Markov kernel associated to generalized ultrametric matrices. An algorithmic approach . . . . .	1
N. Cohen and I. Lewkowicz A characterization of convex cones of matrices with constant regular inertia . . . . .	23
R.B. Bapat Moore–Penrose inverse of set inclusion matrices . . . . .	35
X. Zhao and T. Wang The algebraic properties of the generalized Pascal functional matrices associated with the exponential families . . . . .	45
U. Başer and J.M. Schumacher The equivalence structure of descriptor representations of systems with possibly inconsistent initial conditions. . . . .	53
L. Huang On two questions about quaternion matrices . . . . .	79
J. Micić, J. Pečarić and Y. Seo Complementary inequalities to inequalities of Jensen and Ando based on the Mond–Pečarić method . . . . .	87
R. Bhatia and F. Kittaneh Cartesian decompositions and Schatten norms . . . . .	109
W.E. Longstaff and O. Panaia Single elements of matrix incidence algebras . . . . .	117
S. Feldmann and G. Heinig Partial realization for singular systems in standard form . . . . .	127
R. Tanaka and K. Murota Symmetric failures in symmetric control systems . . . . .	145
E. Reyes, R.H. Villarreal and L. Zárate A note on affine toric varieties. . . . .	173

*Table of Contents continues*

*Table of Contents continued*

M.R. Alaimia	
Weak crossed products and a generalisation of a result of Sarason . .	181
D.C. Torney and J. Wang	
Systems of linear congruences with individual moduli . . . . .	195
P. Favati, G. Lotti, O. Menchi and F. Romani	
Solution of infinite linear systems by automatic adaptive iterations . .	209
Author index to volume 318 . . . . .	227
